

# You touch Milliken products 50 Times a Day

## In your Home

Making food storage containers clear  
Making duct tape both strong and tearable  
Making bathroom sinks, countertops, tubs and appliances anti-microbial  
Making your mattresses fire-resistant  
Making strong plastic parts in your household appliances  
Adding color to detergents, sponges, bowling balls and washable paints and markers  
In household plastics, from laundry baskets to lawn furniture to cups  
To clean carpets with Capture® carpet cleaner

## At Retail

Making plastic packaging - from caps to bottles to blister packaging - on store shelves clear or more colorful

As retail floor coverings

As fabric in store front banners and awnings

## At Work

In the infrastructure that delivers fiber optic cable

In the military uniforms and industrial workwear that protect wearers

As corporate and government floor coverings

## In Public Spaces

Making hospital uniforms that resist stains and viruses  
In hospital, education and senior living center floor coverings  
Making active wound dressings to facilitate the healing of hard-to-heal wounds  
Making theater curtains more fire-resistant  
Making golf courses greener  
In bridges, boat ramps, ditches and other transportation and infrastructure applications

## When Traveling

As the floor coverings and fabrics in airports, hotels and restaurants

In luggage

In automotive airbags, tires, belts & hoses, and plastic parts

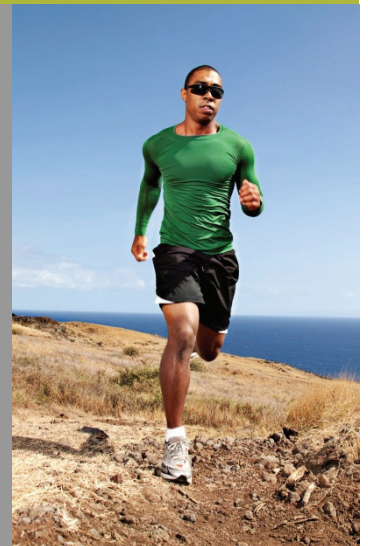

## At Play

Reducing odor and improving comfort in school sports gear, shoes and uniforms

In hunting garments

In helmets, playground equipment, watercraft and race car air dams

In restaurant table linens and food prep areas
